Project Management Turning an idea into a project

Prepared by Ungaluk Safer Communities Program

The cycle of a project

| Pre-project | | Defining the | | Planning the | | Implement | ing the | Closing the project |
|-------------|------------------------------|--------------|------------------------------|--------------|------------------------------|-----------|------------------------------|---------------------|
| | $\qquad \qquad \Box \rangle$ | project | $\qquad \qquad \Box \rangle$ | project | $\qquad \qquad \Box \rangle$ | project | $\qquad \qquad \Box \rangle$ | |

| Pre-project | Defining the | Planning the | Implementing the | Closing the project |
|-------------|-------------------|--------------|------------------|---------------------|
| | project \square | project | project | |

Pre-project

1. You have an Idea!

2. Write out your idea and bring people together to help you

- Why is the project being developed? Describe the issue that the project will address.
- Who will this project help? What is your target group (at-risk, in difficulty, gaining stability) and their ages?
- Share your thoughts with other people and see what is the reaction

3. Determine if it's really needed

- What else exists in your community that is similar?
- Is this really needed? Hold a meeting with the Mayor, social services, community members and whoever else
- Is there existing information out there that shows that your project is needed? Example: number of school kids who have dropped out

| Pre-project | Defining the | Planning the | Implementing the | Closing the project |
|-------------|--------------|-------------------|------------------|---------------------|
| | project 🖒 | project \square | project | |

Defining the project

4. Once you have a good idea of the project, define the:

a. Vision

Your vision is your dream. It's what your organization believes are the perfect conditions for your community = how things would look if the issue important to you was addressed.

Example: No more crime

b. Objectives

There are different types of objectives.

Some examples are: Change in behavior, increase in knowledge about something, increase in skills, reduction in something.

You should use words like: decrease, increase, improve

The best type of objectives are:

- Specific (ex. 40% of the drop-out kids will go back to school or find a job)
- Measurable
- Achievable
- Include the target group

Examples:

- 50% parents increased their knowledge about parenting skills (how to play with child, how to know when child needs love)
- 100% participants increased knowledge in how to prevent suicide leading to fewer suicides
- 5 clients reduced drinking to 1 beer a day and had less angry outbursts
- 100% students improved in reading and writing
- 80% community members now feel safe in their community

5. Define roles and responsibilities

- Sponsor where does the money go through?
- Project manager what skills does that person need?
- Project team what skills does the team need?
- Financial reporting who will keep the books/accounting?
- Do you need to build skills before you start?

| Pre-project | | Defining the | | Planning the | Implement | ing the | Closing the project |
|-------------|-------------------------|--------------|------------------------------|--------------|-----------|-------------------------|---------------------|
| | $\qquad \qquad \Box \\$ | project | $\qquad \qquad \Box \rangle$ | project | project | $\qquad \qquad \Box \\$ | |

Planning the project

6. Make an action plan

| Objective | Planned activity | Tasks and by whom | Timeline (when will the activity take place?) | Expected Results of each activity (short-term, medium-term and long-term) |
|---|-----------------------------------|--|---|---|
| 100% participants increased knowledge in how to prevent suicide leading to fewer suicides | 5 workshops on preventing suicide | Project Coordinator, Wellness worker and the social worker in the community will run the workshops Aaqitauvik healing center will provide extra support if needed | October 1 – November 30, 2016 | 100% participants increased knowledge in how to prevent suicide leading to: 1) fewer suicides 2) more people in community can help those in need |
| | | | | |

Each objective should be connected to an activity that should lead to a specific result

7. Make a Project Budget

Determine a budget and where you will get funding

Things to think about:

- Insurance
- Employee or consultant
- 16.7% taken into pension plan etc. for employee
- Administration costs
- Accountant
- Getting an audit if you haven't been audited in more than 2 years

Learn to keep track of your budget:

- Keep all of your receipts and invoices in one place
- Work closely with the treasurer or accountant to keep track

| | Expected expensions the expected fu | Actual expenses (what was actually spent?) | |
|-------------------------|-------------------------------------|--|--------|
| Activity | Description | Amount | Amount |
| Salaries and benefits | | \$ | \$ |
| Travel | | \$ | \$ |
| Materials | | \$ | \$ |
| Infrastructure costs | | \$ | \$ |
| Other costs | | \$ | \$ |
| Administration costs | | \$ | \$ |
| Total expected expenses | | \$ | |
| Total actual expenses | | | \$ |

Identify your funders:

| Status of funding | Who is the funder, what will they cover? | Amount? |
|---|--|---------|
| a) Organizational contribution Please describe and provide the total amount (in-kind or amount) provided by your organization/institution | | \$ |
| b) Confirmed revenue from other organizations | | \$ |
| Please provide the name(s) of contributor(s), and describe and provide the total amount (inkind or amount) from other contributions to the project. | | |
| c) Potential revenue from other organizations | | \$ |
| Please provide the name(s) of contributor(s), and describe and provide the total amount (inkind or amount) from other contributions to the project. | | |

8. List Partners

| Name, contact info | Role of the partner |
|--------------------|---------------------|
| | |
| | |
| | |
| | |
| | |
| | |
| | |

9. Monitoring and Evaluation

a. How will you know if you achieved your objectives and expected results?

What do you want to know about your project? [what questions will you ask?]

Questions should start with:

- How many?
 - How often?
- How much?
- How?
- When?

Where?

- Who?
- Which?
- What?
- Why?

b. Determine how you will collect the information:

- i. Questionnaire (the participant fills it out)
- ii. Survey (the participant fills it out)
- iii. Observation
- iv. Interviews (you interview the participant)
- v. Notes from meetings
- vi. Documents from project or organization
- vii. Existing data (school records, census, hospitals)

c. Determine who you will collect the information from:

- i. Participants
- ii. Staff members
- iii. Community members
- iv. Funders
- v. Relatives of participants
- vi. Other organizations
- vii. Partners involved in the project

| Objective | Activity | Evaluation question – What do you want to know? | Indicators – What information will you collect to answer the question? | How will you collect it? | Who will you collect it from? | Expected results? |
|--|--|---|--|--|-------------------------------------|--|
| Ex. 100% participants increased knowledge in how to prevent suicide leading to fewer suicides | Ex. 5 workshops on preventing suicide | Ex. How many participants completed the training? How many partners were involved? Did the participants increase their knowledge on how to prevent suicide? Were the participants satisfied with the training? In long-term how many times were participants able to help someone or prevent a suicide? | # times participants participants increased their knowledge % participants satisfied and their feelings # times participants prevented a suicide / # people they helped after the workshop | Ex. Collect # participants completed training Questionnaire to test participants' knowledge Survey to assess level of participants' satisfaction Interview participants on satisfaction Interview participants on who they helped and how | Ex. Participants | Ex. 300 participants completed the training 100% participants increased knowledge in how to prevent suicide 100% participants satisfied 10 times participants able to help someone in community or prevent a suicide |

Examples of things you may want to evaluate:

- How many people completed the project?
- How many people abandoned the project?
- How many people were trained?
- How many partners were involved?
- How many funders were there?
- Number of activities completed.
- Number of services provided.
- Were all activities implemented as planned?
- Did the participants increase their knowledge in something?

- Did the participants' behavior change?
- Were people satisfied with the project?
- What do others think of the project? Do some things need to change?
- Did participants increase skills, knowledge about something?
- Did participants change their behaviour?
- Did participants' health improve?
- Did crime reduce?
- How did the staff members do?

| Pre-project | | Defining the | | Planning the | | Implementing the | Closing the project |
|-------------|-------------------------|--------------|------------------------------|--------------|------------------------------|------------------|---------------------|
| | $\qquad \qquad \Box \\$ | project | $\qquad \qquad \Box \rangle$ | project | $\qquad \qquad \Box \rangle$ | project | <mark>></mark> |

Implementing the project

| 10. Develop a communications plan – how will you get participants for | or your | project? |
|--|---------|----------|
|--|---------|----------|

11. Organize your activities - Follow and update the activity plan

| Planned activity | Tasks and by whom | Timeline (when will the activity take place?) |
|------------------|-------------------|---|
| | | |
| | | |
| | | |

12. Fill in the expected expenses when get funding agreement, and start to keep track of the budget

| | Expected expensions the expected fu | Actual expenses (what was actually spent?) | |
|-------------------------|-------------------------------------|--|--------|
| Activity | Description | Amount | Amount |
| Salaries and benefits | | \$ | \$ |
| Travel | | \$ | \$ |
| Materials | | \$ | \$ |
| Infrastructure costs | | \$ | \$ |
| Other costs | | \$ | \$ |
| Administration costs | | \$ | \$ |
| Total expected expenses | | \$ | |
| Total actual expenses | | | \$ |

13. As you collect information on how your project is doing, fill in the 'Actual Results" column:

| Objective | Activity | Evaluation question – What did you want to know? | Indicators – What information did you collect to answer the question? | How did you collect it? | Who did you collect it from? | Expected results? | Actual results |
|--|--|--|--|--|---------------------------------------|--|--|
| Ex. 100% participants increased knowledge in how to prevent suicide | Ex. 5 workshops on preventing suicide | Ex. How many participants completed the training? How many partners were involved? Did the participants increase their knowledge on how to prevent suicide? Were the participants satisfied with the training? In long-term how many times were participants able to prevent a suicide? | # times participants prevented a suicide / # people they helped after the workshop | Ex. Collect # participants completed training Questionnaire to test participants' knowledge Survey to assess level of participants' satisfaction Interview participants on satisfaction Interview participants on who they helped and how | Ex. Participants | Ex. 300 participants completed the training 100% participants increased knowledge in how to prevent suicide 100% participants satisfied 10 times participants able to help someone in community or prevent a suicide | Ex. 100 participants completed the training 50% participants increased knowledge in how to prevent suicide 80% participants satisfied 20 times participants able to help someone in community or prevented a suicide |

| Pre-project | | Defining the | | Planning the | | Implementi | ng the | Closing the project |
|-------------|------------------------------|--------------|------------------------------|--------------|--------|------------|--------|---------------------|
| | $\qquad \qquad \Box \rangle$ | project | $\qquad \qquad \Box \rangle$ | project | \Box | project | \Box | |

Closing the project

14. Finalize your budget. Make sure all the payments are made. If you have any remaining money not used, call the funder to see what you need to do with the money.

| | Expected expense expected fund | Actual expenses (what was actually spent?) | | |
|-------------------------|--------------------------------|--|--------|--|
| Activity | Description | Amount | Amount | |
| Salaries and benefits | | \$ | \$ | |
| Travel | | \$ | \$ | |
| Materials | | \$ | \$ | |
| Infrastructure costs | | \$ | \$ | |
| Other costs | | \$ | \$ | |
| Administration costs | | \$ | \$ | |
| Total expected expenses | | \$ | | |
| Total actual expenses | | | \$ | |

| 15. Put together the information you collected and use it for a final report for the funder to show what your results were. |
|--|
| 16. Look at your results and see what worked, and what did not work. Make a list of things you need to change for next year. |
| |
| |
| |
| |
